

ABOUT US

Flood Control Asia RS Corporation (“RS”), located in Clark, Province of Pampanga, Philippines, is the leading provider of flood control technology in the Philippines and the rest of Asia-Pacific. It was founded by a German engineer and flood expert, Dr. Andreas Klippe and a Filipina, Ma. Fatima Viray Usi, through the initiative of RS Stepanek KG - Germany’s premier flood control systems company. For 30 years now, over 65,000 flood barrier systems have already been installed to more than 11,000 satisfied customers in 34 countries on 5 continents.

The RS team of 50 people, including 10 engineers, headed by Dr. Klippe, have been staunch advocates of flood-proofing houses, businesses, industrial sites and critical infrastructures. RS believes that installing German modern flood protection systems will help people avoid repairing or replacing properties and losing business opportunities. So far, RS was able to set up flood barriers in commercial mega-centers in the Philippines, MRT, metros and subways in Singapore, 5-star hotels and hospitals in Germany, nuclear power plants in France and the United Kingdom, a university in Ireland, and the Doha Educational City in Qatar.
